Washington, DC 20036

February 1991

Explanatory notes for eating places by check size

The data presented in this publication are taken from the 1987 Census of Retail Trade Miscellaneous Subjects, released in early 1991. Caution should be used when examining this data as the accuracy of data varies from state-to-state and from metropolitan area-to-metropolitan area based on the level of response from participants in the Census. As many as 90 percent or more and as few as 60 percent or less of respondents in a particular geographic area may have reported the data shown for any particular state or metropolitan area. Hence, the figures reported here should be seen as an estimate of actual values rather than as absolute values.

In all of the tables presented, data are only given for those states or metropolitan areas for which it was available. In some cases, there are establishment figures but no sales information given. These sales data have been omitted in accordance with Census Disclosure rules. In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. Sales data for these firms is included in totals for a particular category such as restaurants and lunchrooms or cafeterias.

Terms used in the tables

The data for restaurants and lunchrooms, refreshment places (limited menu or fast food restaurants) and cafeterias are presented by average check--the average cost per meal. These data include information on:

- the number of establishments
- sales
- sales per establishment
- population per establishment

Population per establishment is calculated by dividing an estimate of 1987 resident population of each area by the number of establishments. This is a measure of density or concentration of establishments. Hence, the lower the population per establishment number, the greater the concentration of establishments located in a particular state or metropolitan area. This data can be used as a means of determining market saturation for types of particular establishments.

Data are given for all states and metropolitan areas, where available. The metropolitan areas used in this publication are defined as Metropolitan Statistical Areas (MSA) or Primary Metropolitan Statistical Areas (PMSA) by the Office of Management and Budget. An MSA is an integrated economic and social unit with a population nucleus of at least 50,000 inhabitants. Each MSA consists of one or more than one counties meeting standards of metropolitan character; in New England, cities or towns rather than counties are the component geographic units. PMSA's are MSA's that may be combined with other PMSA's to make up consolidated metropolitan areas.

List of Tables

Table number	Table
1	Establishment, sales and ratios for states by average check size-restaurants and lunchrooms
2	Establishment, sales and ratios for states by average check size-refreshment places (limited menu restaurants)
3	Establishment, sales and ratios for states by average check size-cafeterias
4	Establishment, sales and ratios for metropolitan areas by average check size-restaurants and lunchrooms
5	Establishment, sales and ratios for metropolitan areas by average check size-refreshment places (limited menu restaurants)
6	Establishment, sales and ratios for metropolitan areas by average check size-cafeterias
7-11	Rank of states by number of restaurants-
7	Average check below $7.00
8	Average check $7.00-$14.99
9	Average check $15.00-$29.99
10	Average check $30.00 and over
11	Average check $15.00 and over
12-16	Rank of states by population per restaurant
12	Average check below $7.00
13	Average check $7.00-$14.99
14	Average check $15.00-$29.99
15	Average check $30.00 and over
16	All check sizes (total restaurants)
17-20	Top 50 Metropolitan Areas in number of restaurants
17	Average check below $7.00
18	Average check $7.00-$14.99
19	Average check $15.00-$29.99
20	Average check $30.00 and over
21-24	Top 50 Metropolitan Areas in population per restaurant
21	Average check below $7.00
22	Average check $7.00-$14.99
23	Average check $15.00-$29.99
24	Average check $30.00 and over
